

If you're passionate about data, machine learning, analytics, and software development, value teamwork, and enjoy collaborative projects, we'd love to meet you. If you thrive on diverse data projects and enjoy sharing your knowledge, we look forward to getting to know you. Join us on our journey towards success in the field of Data and Analytics at Parsionate.

Senior Data Engineer (all genders)

What you can expect:

- You will take on technical project responsibility in the Data and Analytics domain at Parsionate, guiding our customers towards success, particularly in the areas of Cloud and Data Engineering

Your skillset:

- You have successfully completed your studies in Computer Science, Mathematics, Physics, or a related field
- You have gained several years of practical experience as a Data

- You will design and implement scalable data pipelines, incorporating data from various sources to deliver finished solutions
 - Collaborating with Data Scientists and Analysts, you will conceptualize data solutions, implement them, and ensure continuous and efficient operation
 - You will monitor, maintain, and expand our AI infrastructure in the Cloud
 - In addition to implementing solutions, you will share your expertise within the organization, advising our customers on Microservices and associated tools
 - Occasionally, you will support the sales team in presales situations
 - You'll work in an agile environment where you have a say in which tasks you tackle
- Engineer with a focus on Machine Learning
- You can effectively communicate with our customers, bridging the gap between the technical and business worlds
 - You are familiar with and utilize current technologies for operating Data Science solutions in the Cloud (such as Docker, Kubernetes, Terraform)
 - You possess deep knowledge of current programming concepts, such as Design Patterns or data structures, using Python. When you hear CD, you don't immediately think of an outdated storage medium
 - Ideally, you have experience with common Data Science stacks (like Sklearn or Mlflow) and proficiency in common software tools (Git, PyCharm)
 - You enjoy working with data visualization tools (e.g., PowerBI). DevOps topics excite you, and you keep yourself up to date
 - You are open, communicative, enjoy teamwork, and take pleasure in sharing knowledge
 - You have excellent written and verbal communication skills in both German and English.

About Parsionate

Parsionate advises companies, unlocking their potentials or co-creating entirely new solutions with them. All based on data and its possibilities. We call it Data Leadership. With our expertise, we focus on the benefits and successes we generate for our customers and partners. That's precisely why Parsionate works "end-to-end" – from strategy development to full technological implementation. Over 200 experts work on this mission at our Parsionate locations across Europe. Become a part of it.
